May 14, 2024

Dear Residents,

Subject: Update on Water Tap Issuance Policy

Over the years, our city has experienced steady growth and development, which has led to an increasing demand for essential resources such as water. As stewards of our community's infrastructure and resources, it is our responsibility to ensure equitable access to these resources while also maintaining their sustainability for future generations.

After careful consideration and evaluation of various factors including infrastructure capacity, water availability, and regulatory requirements, we regret to inform you that effective May 13, 2024, the city can no longer issue new water taps outside the city limits. This decision was not made lightly, and we understand that it may have implications for those seeking to establish new properties or developments in these areas.

We recognize the importance of access to clean and reliable water, and we remain committed to serving our existing residents to the best of our abilities. For those already connected to our water supply system, rest assured that there will be no changes or disruptions to your service as a result of this policy update.

We understand that this news may raise questions or concerns, and we are here to provide assistance and guidance wherever possible. We are committed to working with the community to find long-term solutions and will keep you informed of any developments. In the meantime, we encourage residents to explore alternative water sources, such as well water, which can be a viable option for those living outside the city limits.

Thank you for your understanding and cooperation as we work to ensure the sustainable management of our resources and the continued well-being of our community.
